## INTERNATIONAL SEARCH REPORT

(PCT Article 18 and Rules 43 and 44)

Applicant's or agent's file reference <b>CM1709/VB</b>	<b>FOR FURTHER ACTION</b> see Notification of Transmittal of International Search Report (Form PCT/ISA/220) as well as, where applicable, item 5 below.	
International application No. <b>PCT/IB 99/ 00185</b>	International filing date (day/month/year) <b>02/02/1999</b>	(Earliest) Priority Date (day/month/year) <b>17/02/1998</b>
Applicant <b>THE PROCTER &amp; GAMBLE COMPANY et al.</b>		

This International Search Report has been prepared by this International Searching Authority and is transmitted to the applicant according to Article 18. A copy is being transmitted to the International Bureau.

This International Search Report consists of a total of 3 sheets.

It is also accompanied by a copy of each prior art document cited in this report.

1. **Basis of the report**

a. With regard to the **language**, the international search was carried out on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.

the international search was carried out on the basis of a translation of the international application furnished to this Authority (Rule 23.1(b)).

b. With regard to any **nucleotide and/or amino acid sequence** disclosed in the international application, the international search was carried out on the basis of the sequence listing :

contained in the international application in written form.

filed together with the international application in computer readable form.

furnished subsequently to this Authority in written form.

furnished subsequently to this Authority in computer readable form.

the statement that the subsequently furnished written sequence listing does not go beyond the disclosure in the international application as filed has been furnished.

the statement that the information recorded in computer readable form is identical to the written sequence listing has been furnished

2.  **Certain claims were found unsearchable** (See Box I).

3.  **Unity of invention is lacking** (see Box II).

4. With regard to the **title**,

the text is approved as submitted by the applicant.

the text has been established by this Authority to read as follows:

5. With regard to the **abstract**,

the text is approved as submitted by the applicant.

the text has been established, according to Rule 38.2(b), by this Authority as it appears in Box III. The applicant may, within one month from the date of mailing of this international search report, submit comments to this Authority.

6. The figure of the **drawings** to be published with the abstract is Figure No.

as suggested by the applicant.

because the applicant failed to suggest a figure.

because this figure better characterizes the invention.

None of the figures.

Patent family members are listed in annex.

### Special categories of cited documents :

- "A" document defining the general state of the art which is not considered to be of particular relevance
- "E" earlier document but published on or after the international filing date
- "L" document which may throw doubts on priority claim(s) or which is cited to establish the publication date of another citation or other special reason (as specified)
- "O" document referring to an oral disclosure, use, exhibition or other means
- "P" document published prior to the international filing date but later than the priority date claimed

- "T" later document published after the international filing date or priority date and not in conflict with the application but cited to understand the principle or theory underlying the invention
- "X" document of particular relevance; the claimed invention cannot be considered novel or cannot be considered to involve an inventive step when the document is taken alone
- "Y" document of particular relevance; the claimed invention cannot be considered to involve an inventive step when the document is combined with one or more other such documents, such combination being obvious to a person skilled in the art.
- "&" document member of the same patent family

# INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No. PCT/IB99/00185

## I. Basis of the report

1. This report has been drawn on the basis of (*substitute sheets which have been furnished to the receiving Office in response to an invitation under Article 14 are referred to in this report as "originally filed" and are not annexed to the report since they do not contain amendments.*):

### Description, pages:

1-11 as originally filed

### Claims, No.:

1-14 as originally filed

2. The amendments have resulted in the cancellation of:

the description,      pages:  
 the claims,      Nos.:  
 the drawings,      sheets:

3.  This report has been established as if (some of) the amendments had not been made, since they have been considered to go beyond the disclosure as filed (Rule 70.2(c)):

4. Additional observations, if necessary:

## V. Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

### 1. Statement

Novelty (N)	Yes:	Claims 6-12,
	No:	Claims 1-5, 13, 14
Inventive step (IS)	Yes:	Claims 6, 7, 9

EXAMINATION REPORT**

**2. Citations and explanations**

**see separate sheet**

**VIII. Certain observations on the international application**

The following observations on the clarity of the claims, description, and drawings or on the question whether the claims are fully supported by the description, are made:

**see separate sheet**

**Section VIII: Clarity**

Claim 1 does not fulfil Art. 6 PCT since the wording thereof does not clearly reflect the fact that the dopants are selected from those compounds which have to be adsorbed or derivatives thereof as mentioned in the description on page 3, fourth paragraph.

The letter "£" used on page 6 in combination with a certain range is not clear.

**Section V**

**Novelty**

The present invention provides an odour controlling material comprising an inorganic adsorbent material which is preferably selected from active silica and at least one dopant selected from fatty acids, amines, ammonia, alcohols, aldehydes, ketones, and heterocompounds.

Prior art document D1 (DATABASE WPI Section Ch, Week 9329 Derwent Publications Ltd., London, GB; Class D22, AN 93-231547 XP002036165 & JP 05 154187 A (MITSUBISHI MATERIALS CORP)) describes a deodorising cartridge comprising an inorganic material in the form of silica gel or zeolite which are impregnated with an aqueous solution of aldehyde compounds and an aqueous solution of organic acid compounds.

The aldehyde and acid impregnated (or doped) article of D1 takes away novelty of claims 1 to 5, 13 and 14; these claims do therefore not meet the requirements of Art. 33(2) PCT.

**Inventive Step**

The present invention provides adsorbent, odour controlling materials of improved adsorption power, especially of improved adsorption power versus selected compounds.

As set out in claims 6, 7 and 9 the adsorption capability can be improved by incorporating into an adsorbent material certain amines, heterocompounds or

**INTERNATIONAL PRELIMINARY  
EXAMINATION REPORT - SEPARATE SHEET**

compounds bearing more than one active group. Document D1 which is available as abstract only, and which represents the nearest prior art document since it is concerned with the deodorising of ammonia and certain sulfur compounds, does neither disclose nor suggest the above-mentioned dopants, thus they are considered to be a non-obvious alternative to those mentioned in D1.

Hence, claims 6, 7 and 9 appear to involve an inventive merit.

The subject-matter mentioned in claims 8 and 10 is an obvious modification of the material disclosed in D1, which does not impart an inventive step to these claims.

The fact that the odour controlling material is incorporated into an adsorbent article as defined in claims 11 and 12 is obvious from the teaching of prior art document D2 (WO-A-8 101 643) which discloses that materials such as zeolites and silica gel are adsorbents which can be used in adsorbing articles such as diapers.

Consequently, claims 1 to 5, 8, 10, 11 to 14 do not fulfil the requirements of Art. 33(3) PCT.
